

Bitsliced is the creator of the **Sliced platform** based on blockchain technology with a one of a kind ecosystem that makes minting, collecting and trading physical items in the digital world simplified and fun.

Sliced is a Web3 app with Social-Fi and Game-Fi attributes. The app's features will change the landscape of how the majority of people trade and communicate. Features such as channels, instant cashback and fractional ownership of digital and real-world assets will be key to the success of the app.

Current problems with the market for fractional ownership.

- ⚡ There is still no mechanism in place for connecting real world items to blockchain.
- ⚡ Management of digital/real-world assets is complicated.
- ⚡ Process of transferring shares and funds is too centralized.
- ⚡ The traditional process relies heavily on third parties.
- ⚡ Current NFT marketplaces are not appealing enough.
- ⚡ NFTs today rarely provide any utilities.

The current state of the fractional ownership market.

“Although fractional ownership is by far the fastest growing segment of the vacation home market, it is still a relatively new concept, and its many possible variations continue to be explored. The constantly changing array of fractional property options, along with a lack of consistency in terminology, can create confusion for buyers, and make informed decision-making difficult.”

– D. Andrew Sirkin

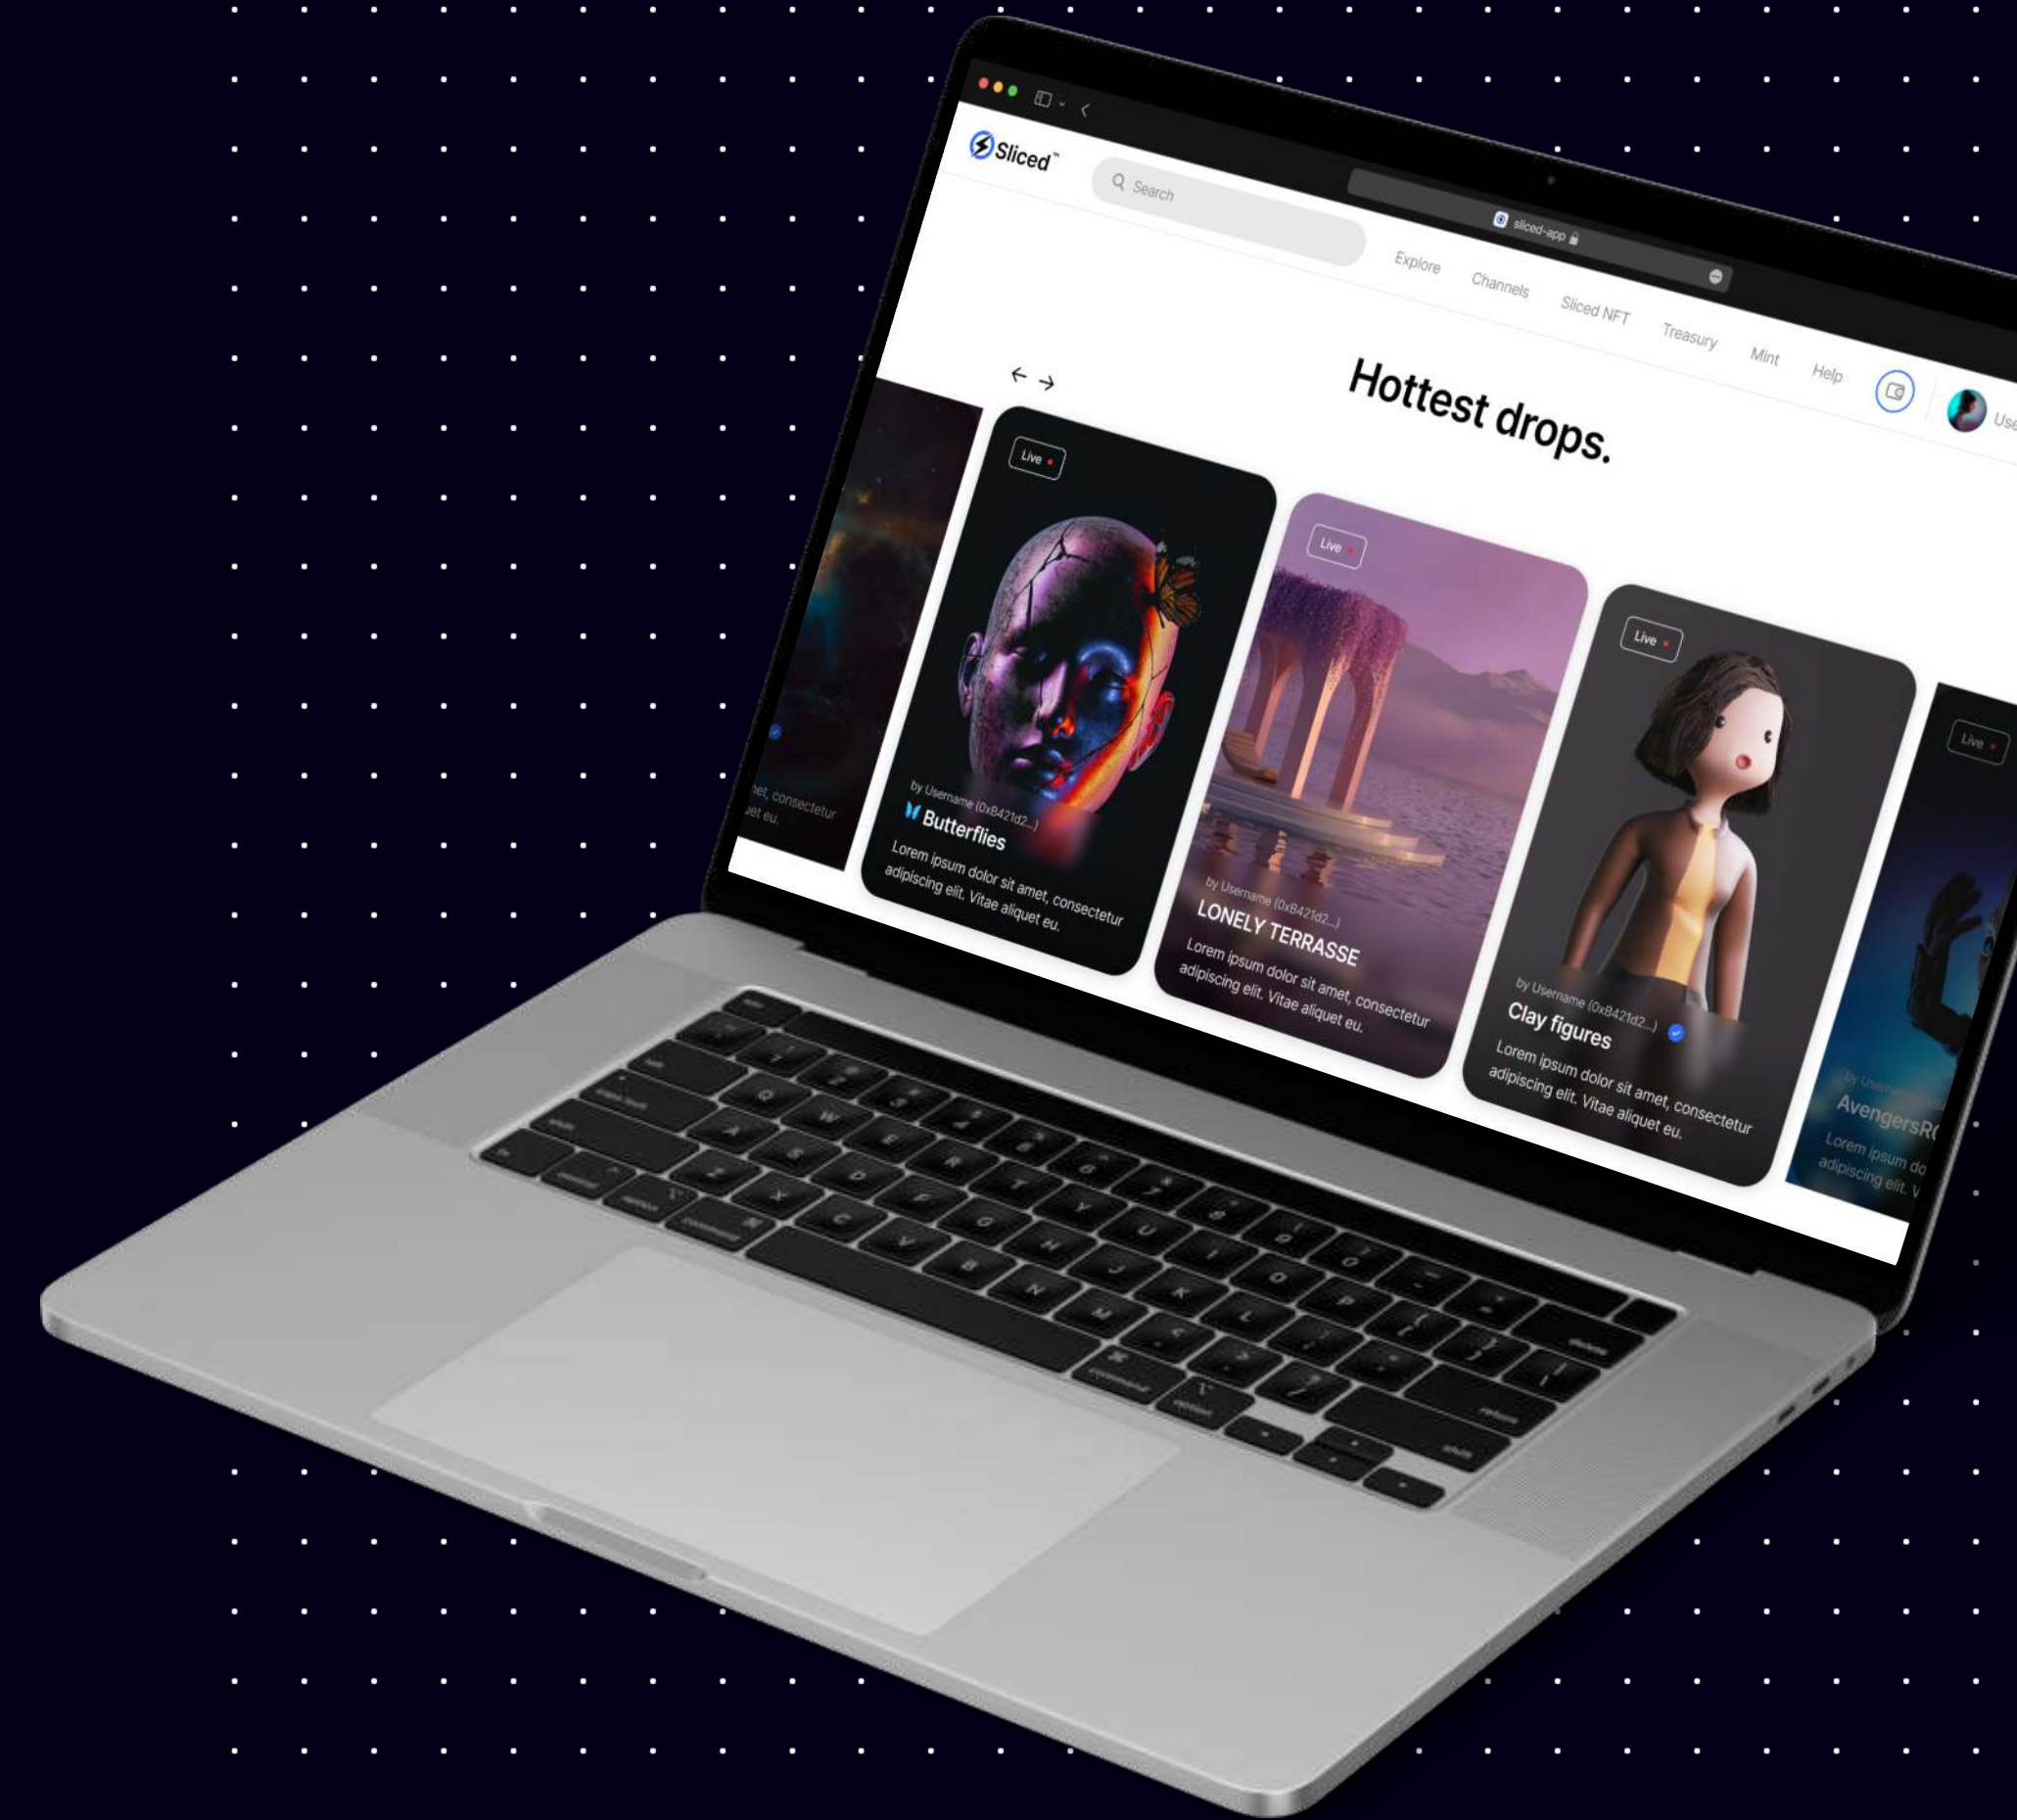

BRINGING THE NFT WORLD TO THE NEXT LEVEL.

The marketplace offers:

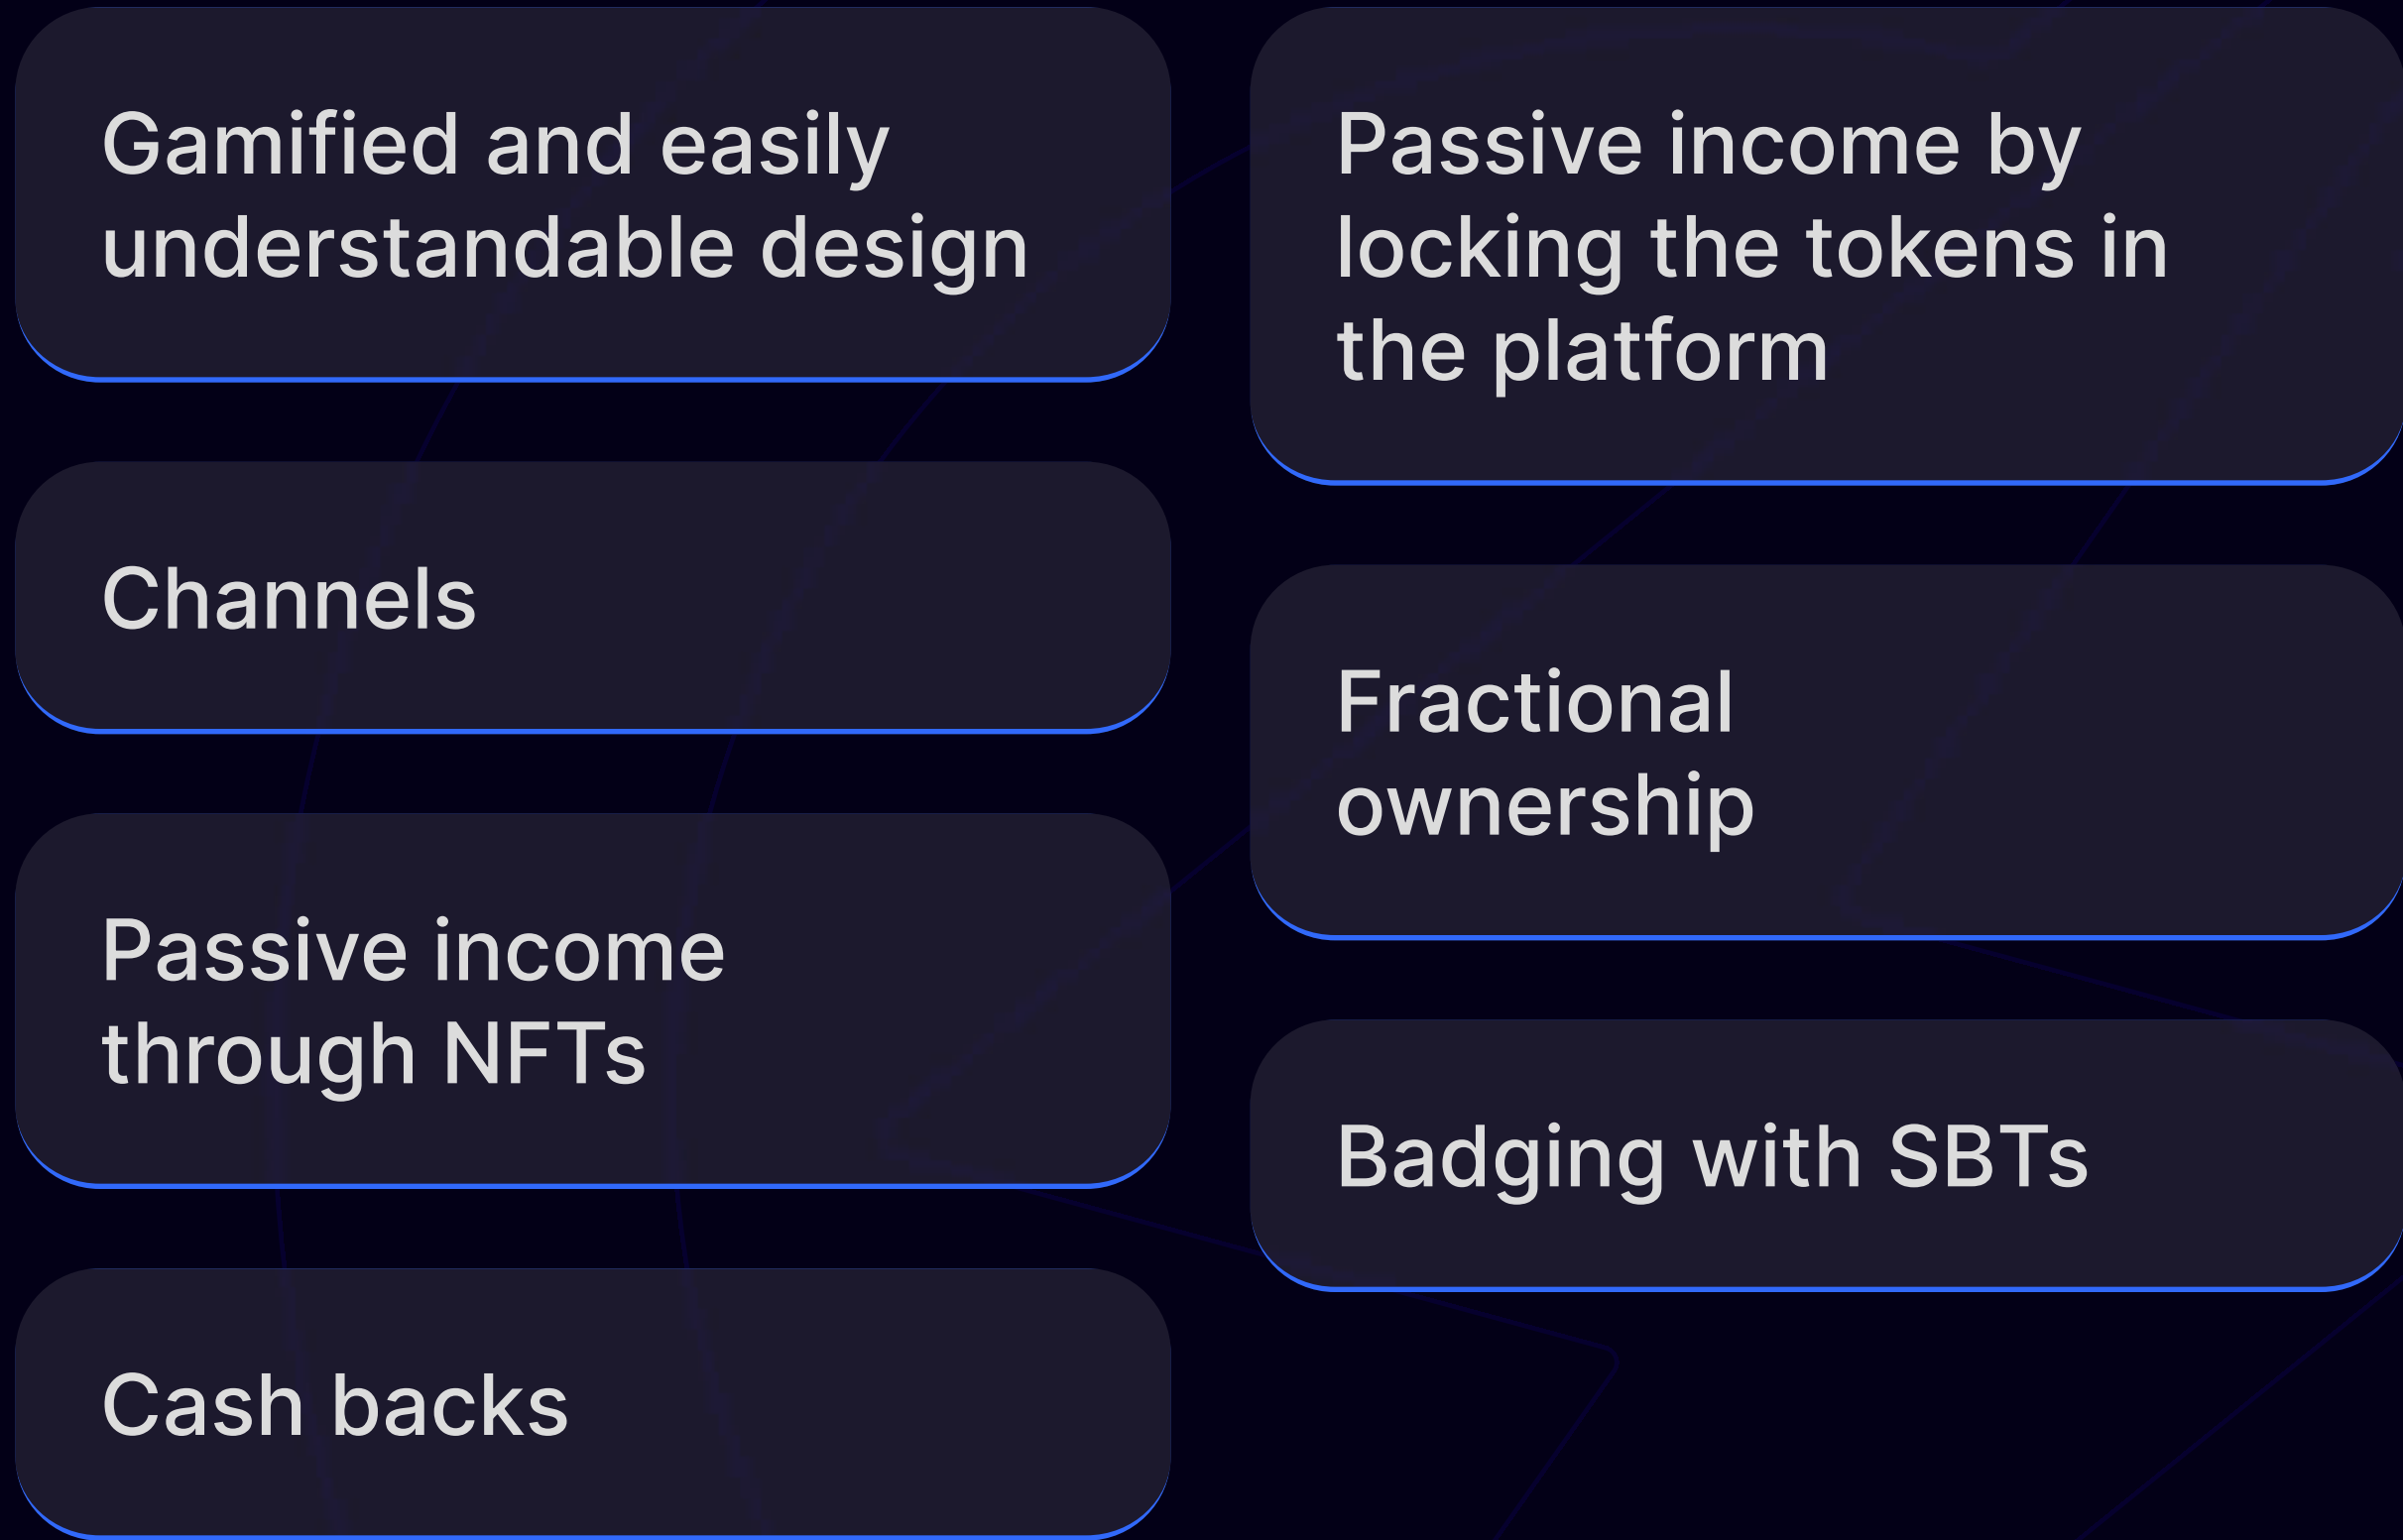

- ⚡ Legal mechanism for managing real world assets through ownership of their NFTs.
- ⚡ A modern app, allowing the user to conveniently manage their real/digital world assets.
- ⚡ Third parties removed for trustless, audited smart contracts.
- ⚡ Quality products thanks to our partnerships.
- ⚡ A combination of SocialFi and GamiFi aspects to make the best user experience.
- ⚡ A variety of utility NFTs that have actual value behind them.

Our mission is to inspire millions of people to enter the NFT world, and make them understand that the NFTs are here to stay.

Additionally, we aim to be the bridge between the two worlds, the real world and the digital world. An easily accessible app enabling purchases of real world items, through NFTs.

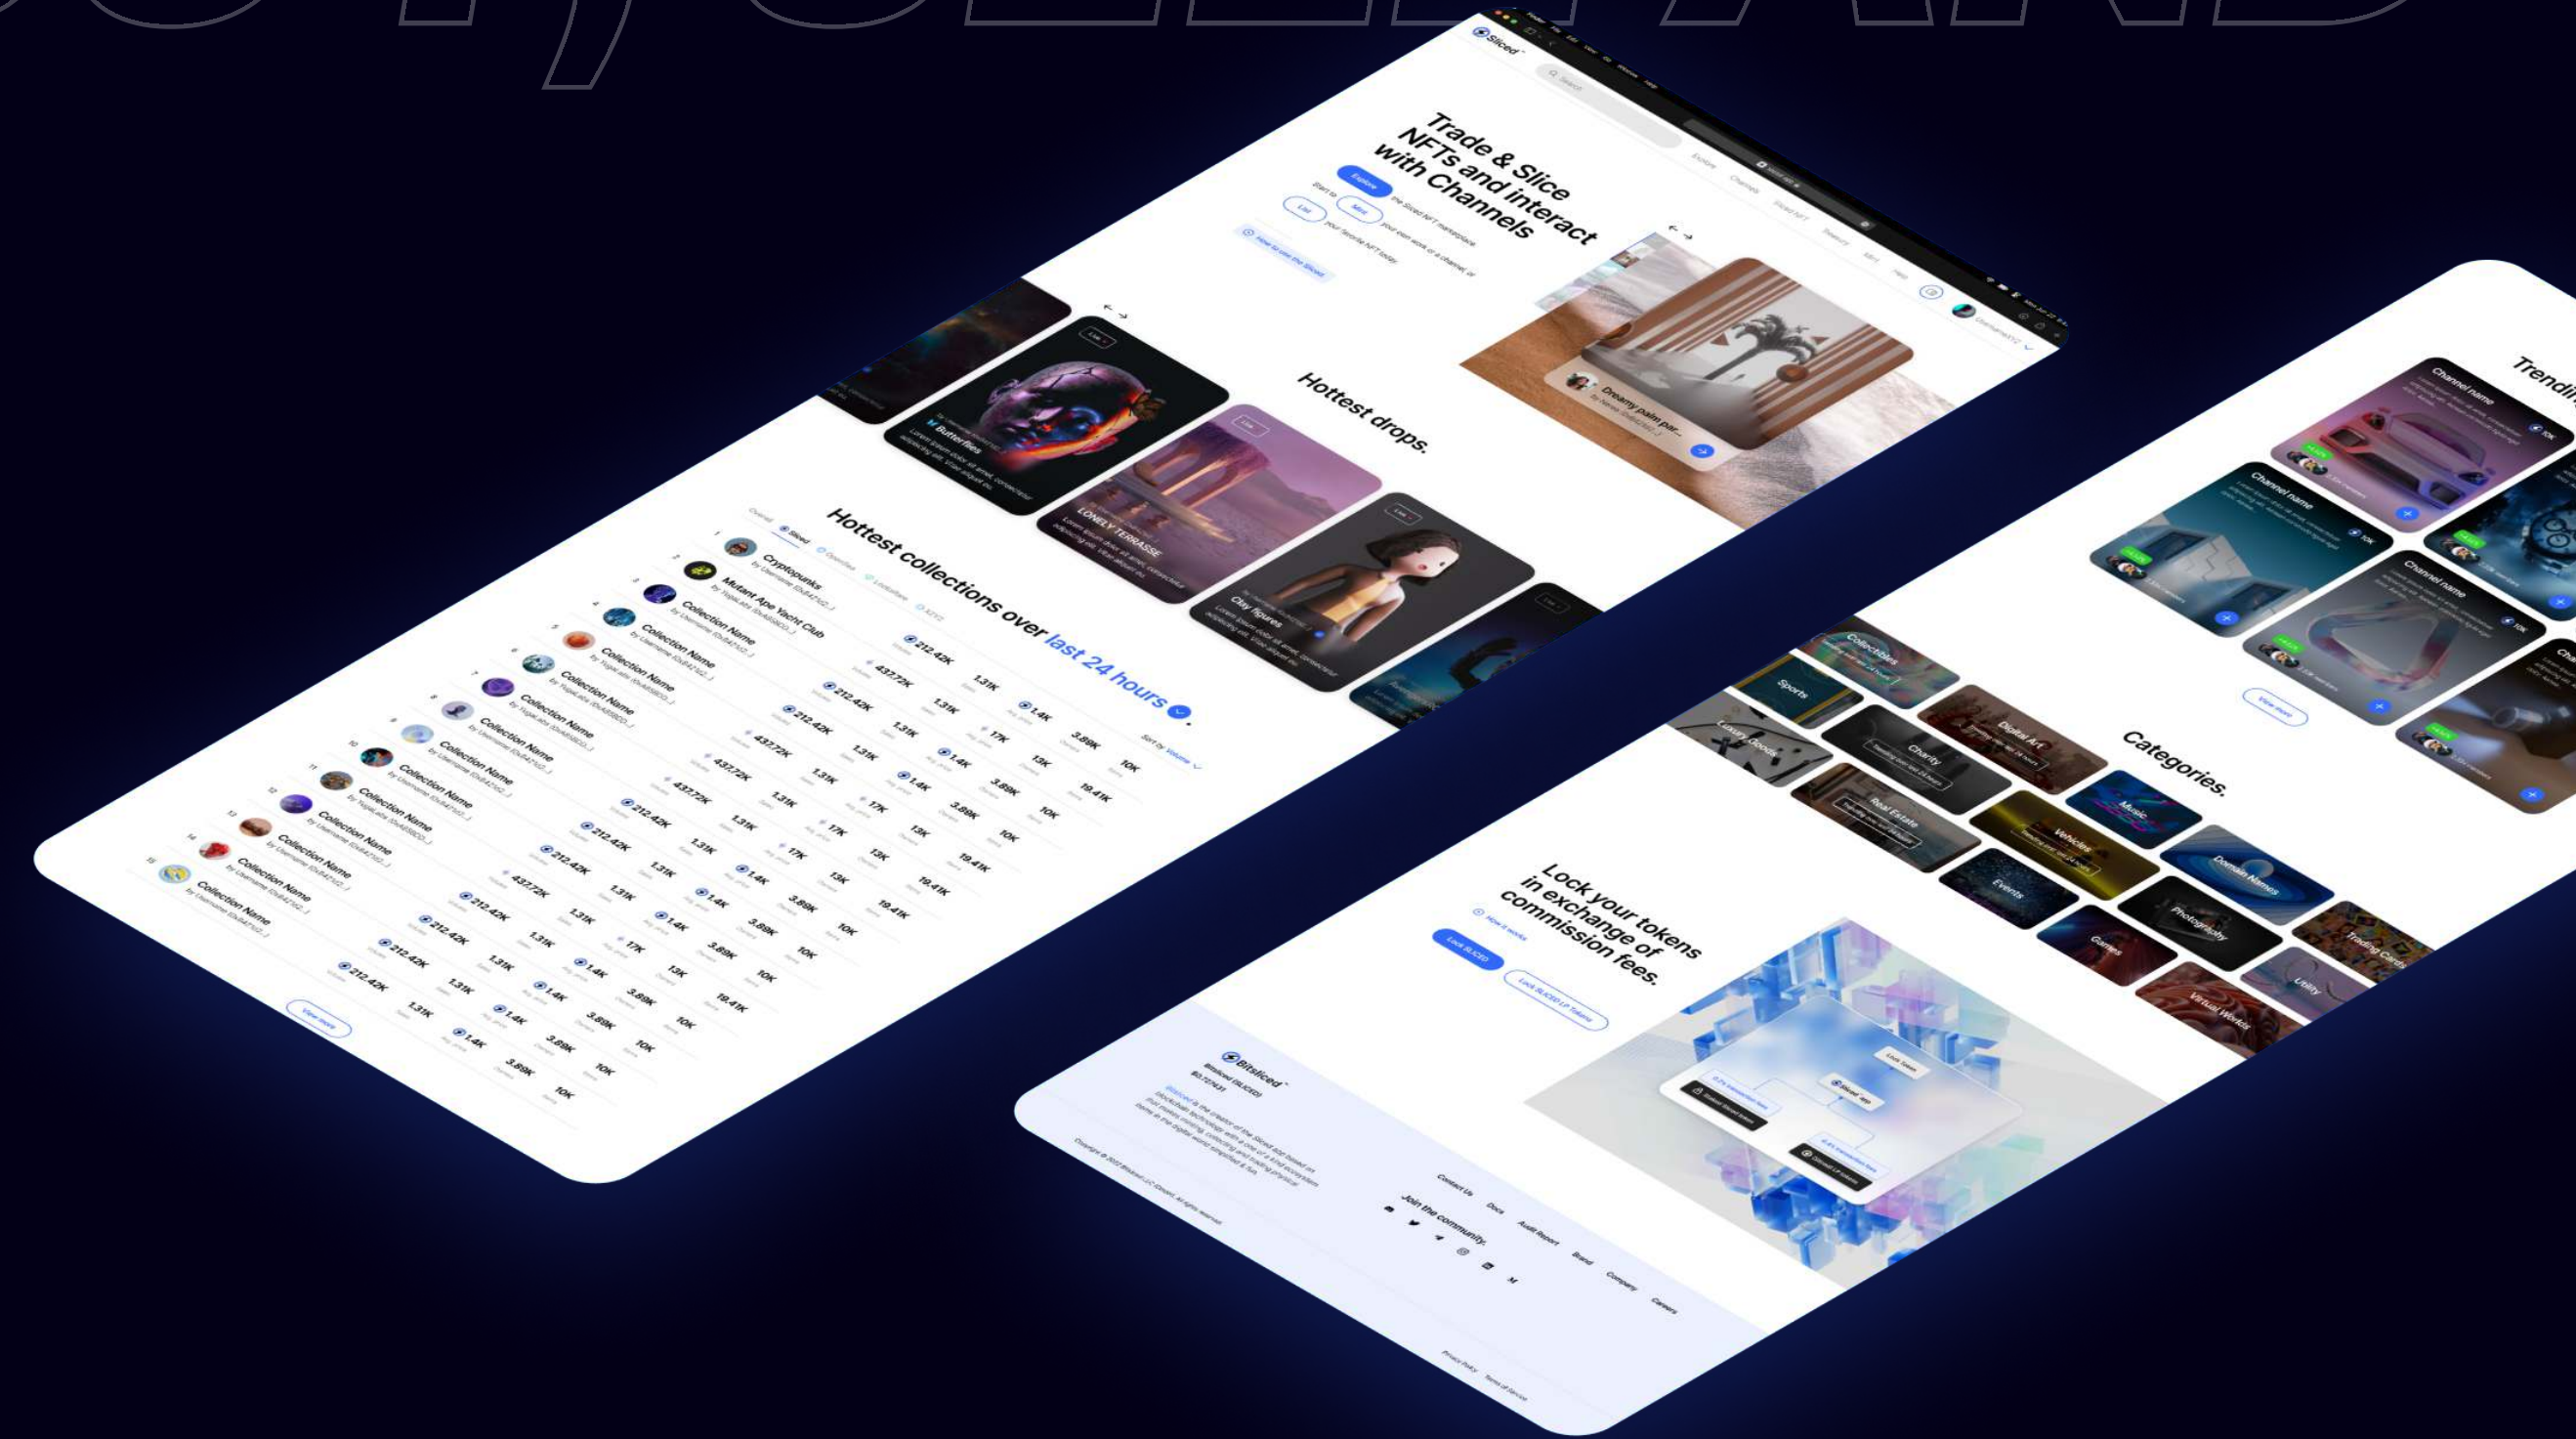

Concept of Sliced™

MAKING IT EASIER FOR PEOPLE TO BUY, SELL AND MINT NFTS

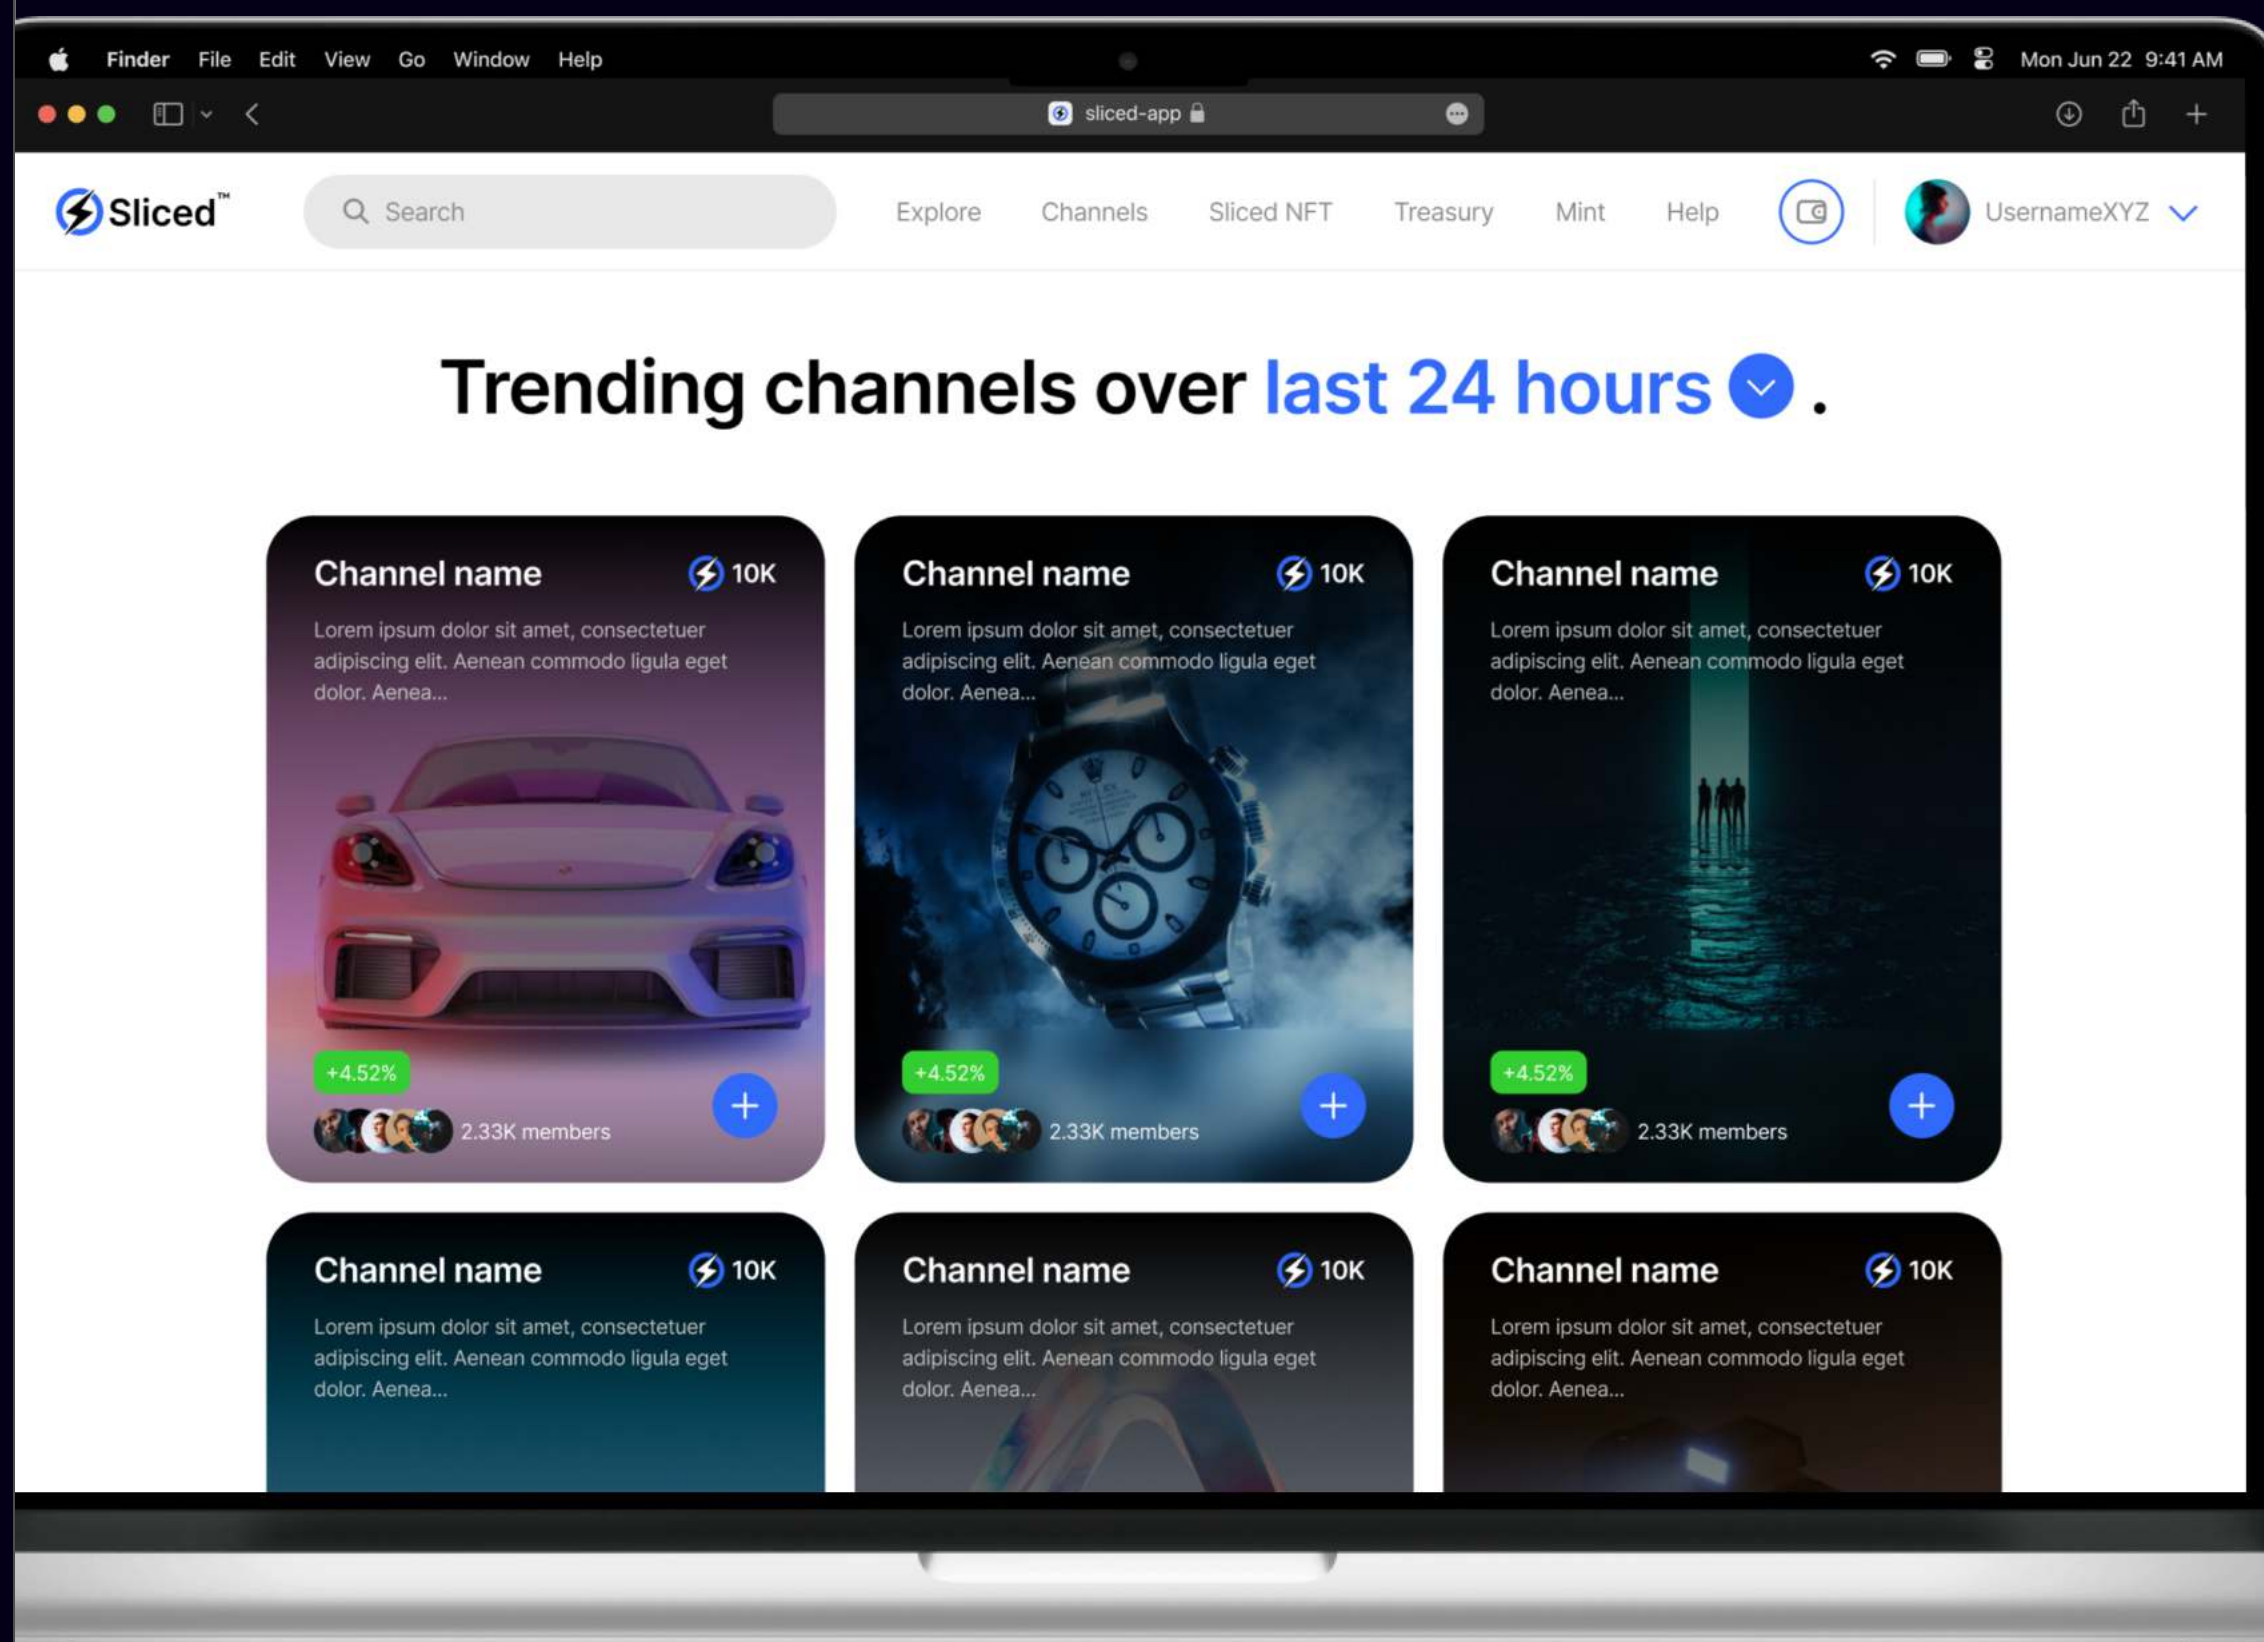

Gamified and easily understandable design

We're taking a lot of care while creating the designs of the app. Later on we'll be asking community members to give us their feedback about the application. This way, we can ensure a friendly UX/UI experience for the users.

MONETIZE SOCIAL PRESENCE

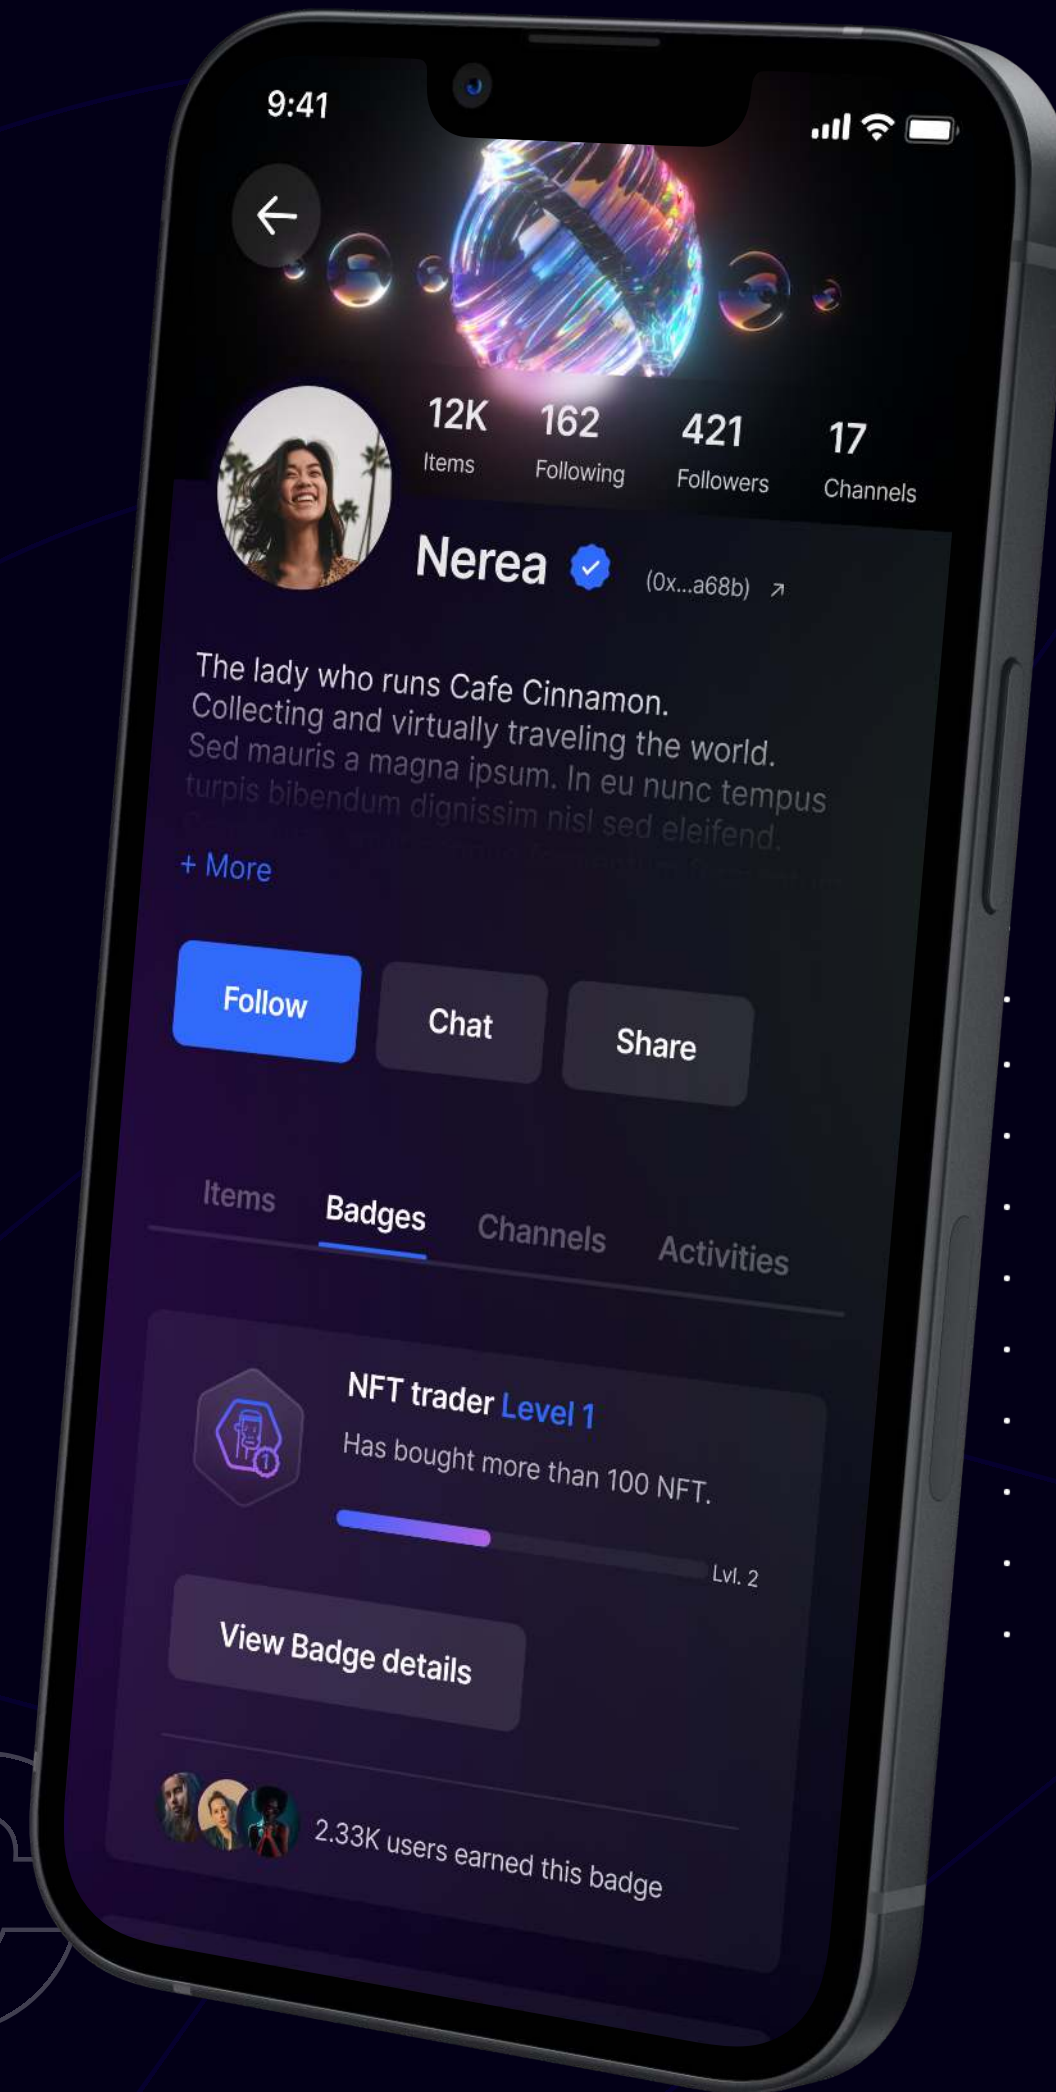

Channels

Channels are essentially community groups where people will be able to chat, discuss, trade, and mint NFTs with each other. Sliced users will be able to create channels and create a secondary income through their channel. The channel owner can decide the entry price and channel lifetime duration. This feature implements exclusivity and supports the creators. Patreon, but for the NFT space!

Badging with SBTs

The Sliced app has a badging system integrated as SBTs. With this set of Sliced badges, members of the app will get certain perks within the ecosystem. Sliced badges can be obtained by fulfilling specific achievements, such as trading volume, charity NFTs, holding a passive income NFT, holding the hottest collection, etc...

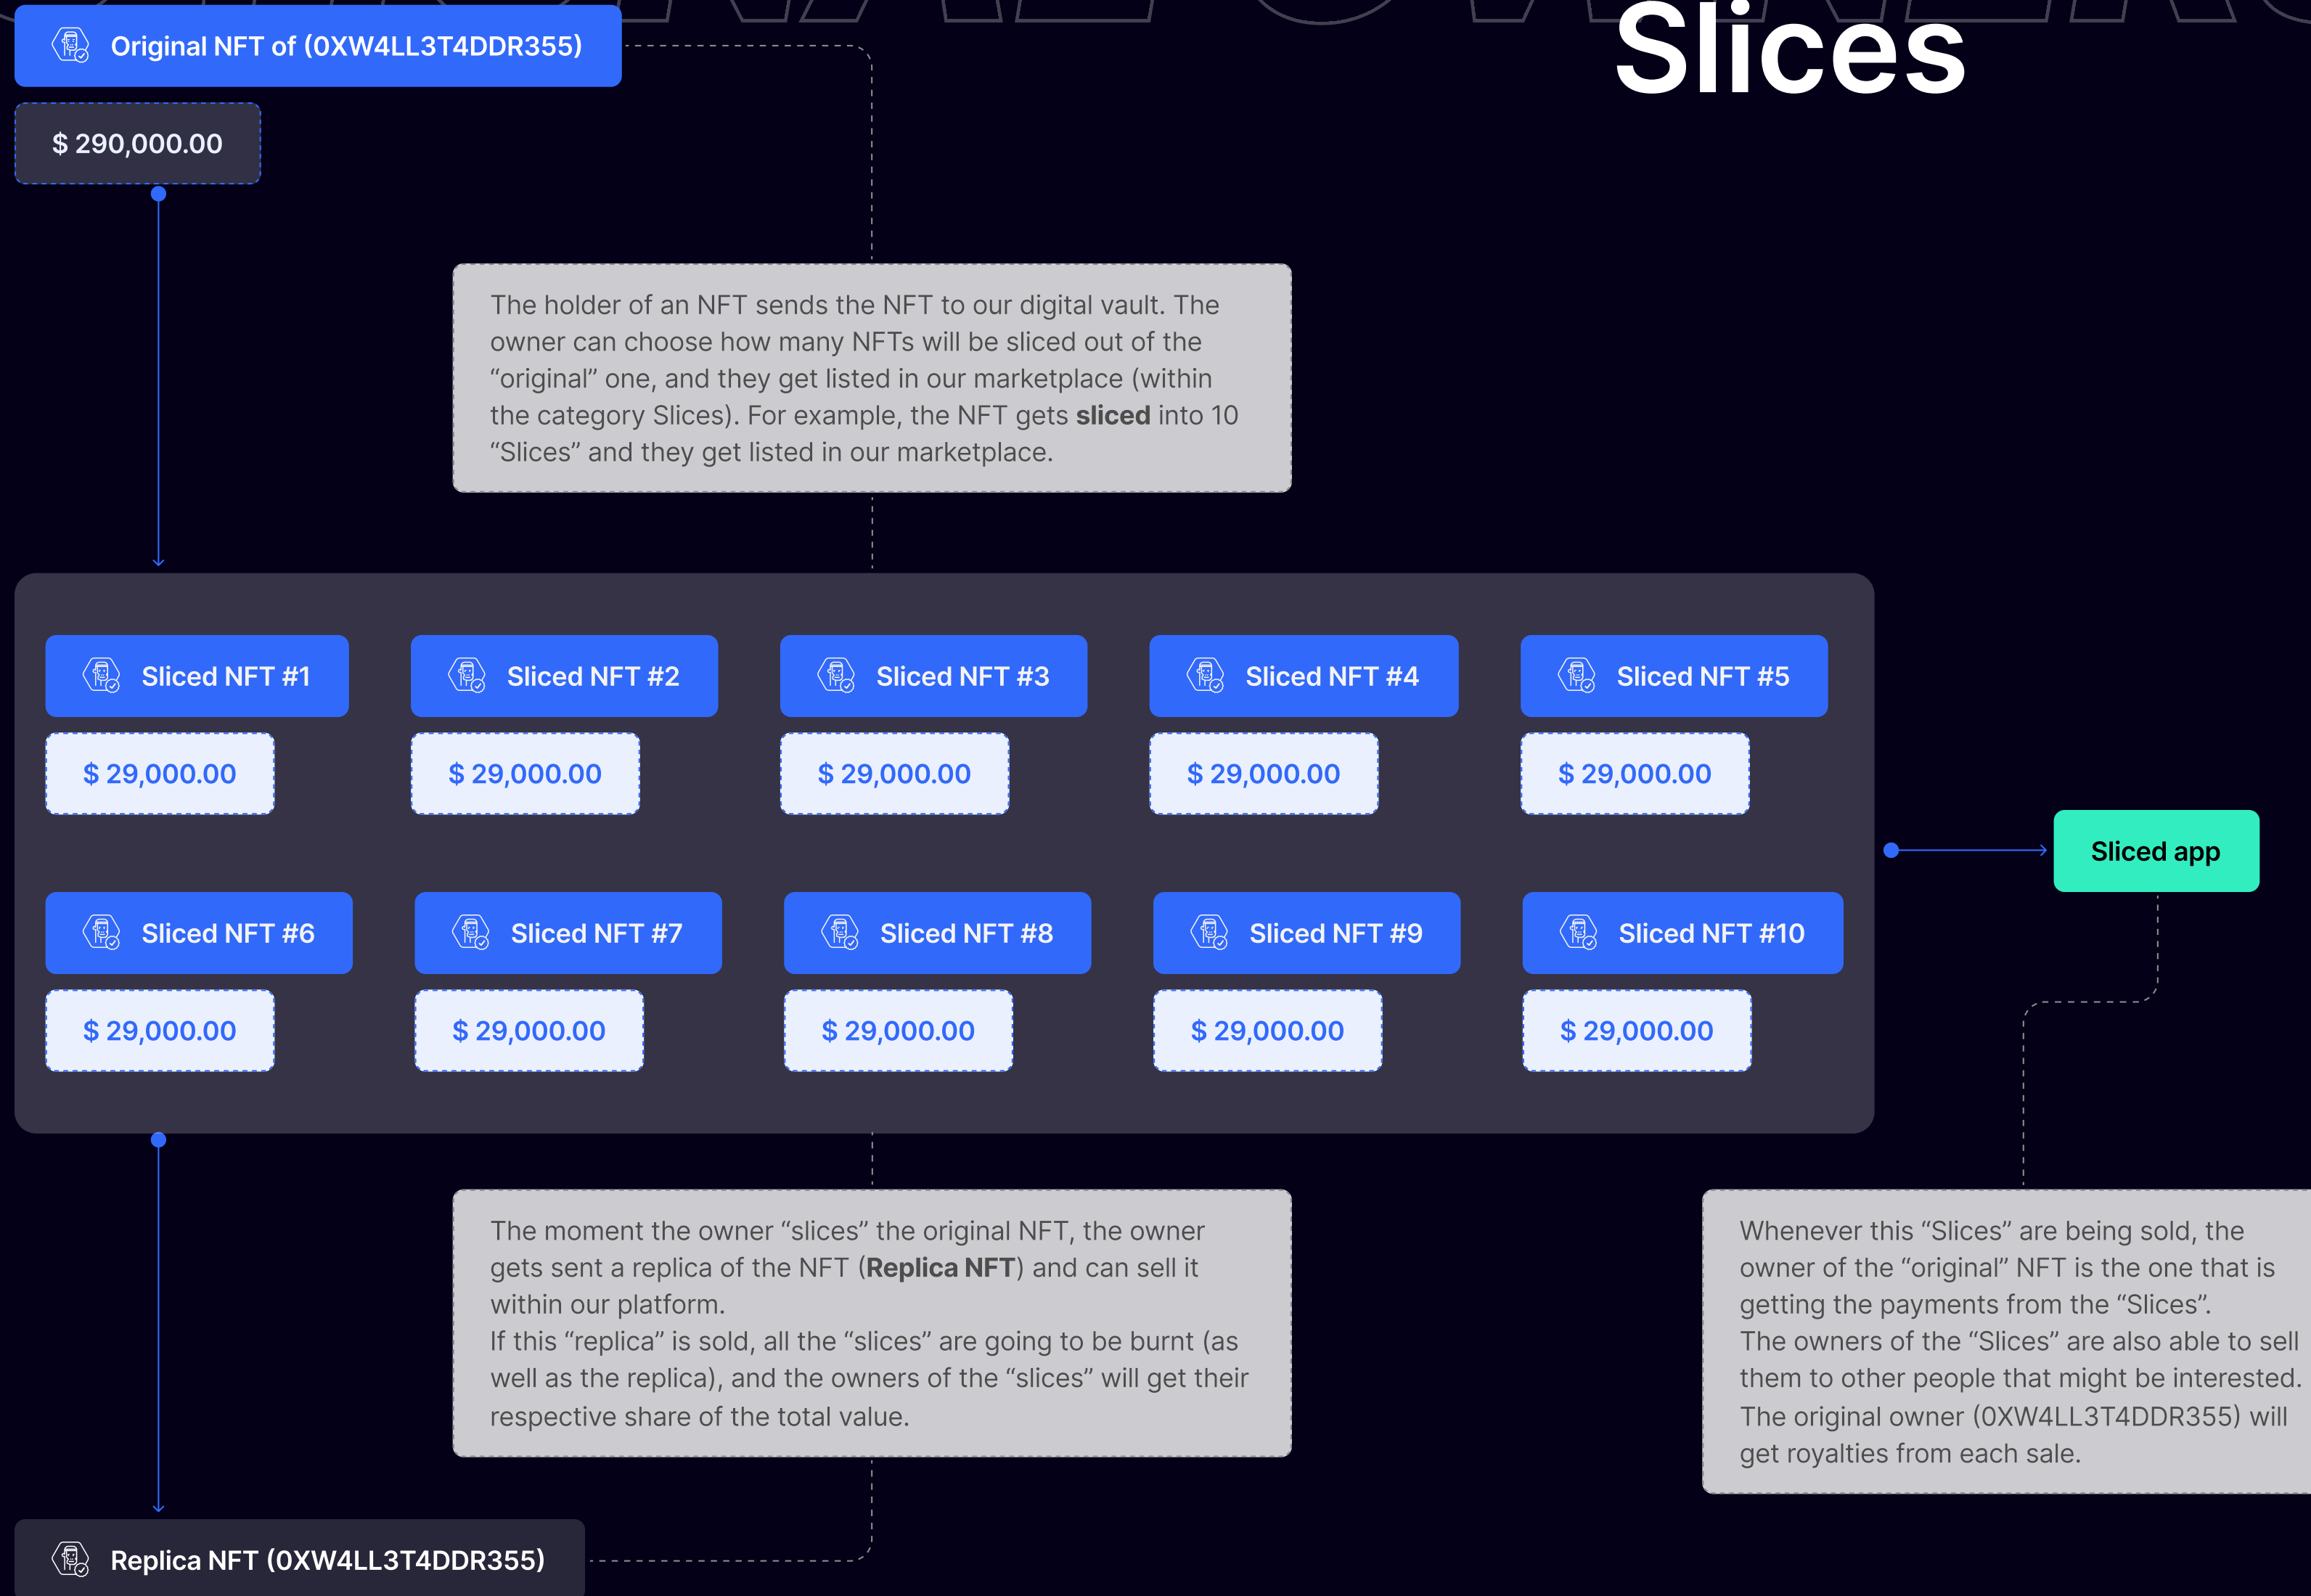

FULFILL SPECIFIC
ACHIEVEMENTS

FRACTIONAL OWNERSHIP

Slices

GENERATE INCOME

Passive income

Through NFTs

At Bitsliced, we're always working on bringing value to our NFTs, and we're partnering up with real-world companies that provide a steady revenue stream through purchasing items. Users will be able to buy NFTs and earn passive income through them.

 NFT in the Sliced app

The profit can vary depending on the partnerships product.

 Sliced NFT passive income category

By locking the tokens in the platform

Users that lock their SLICED tokens in the platform will be able to claim a percentage of the fees generated the past month, the "claims" will happen once every month. We are creating an NFT platform created by traders and owned by traders.

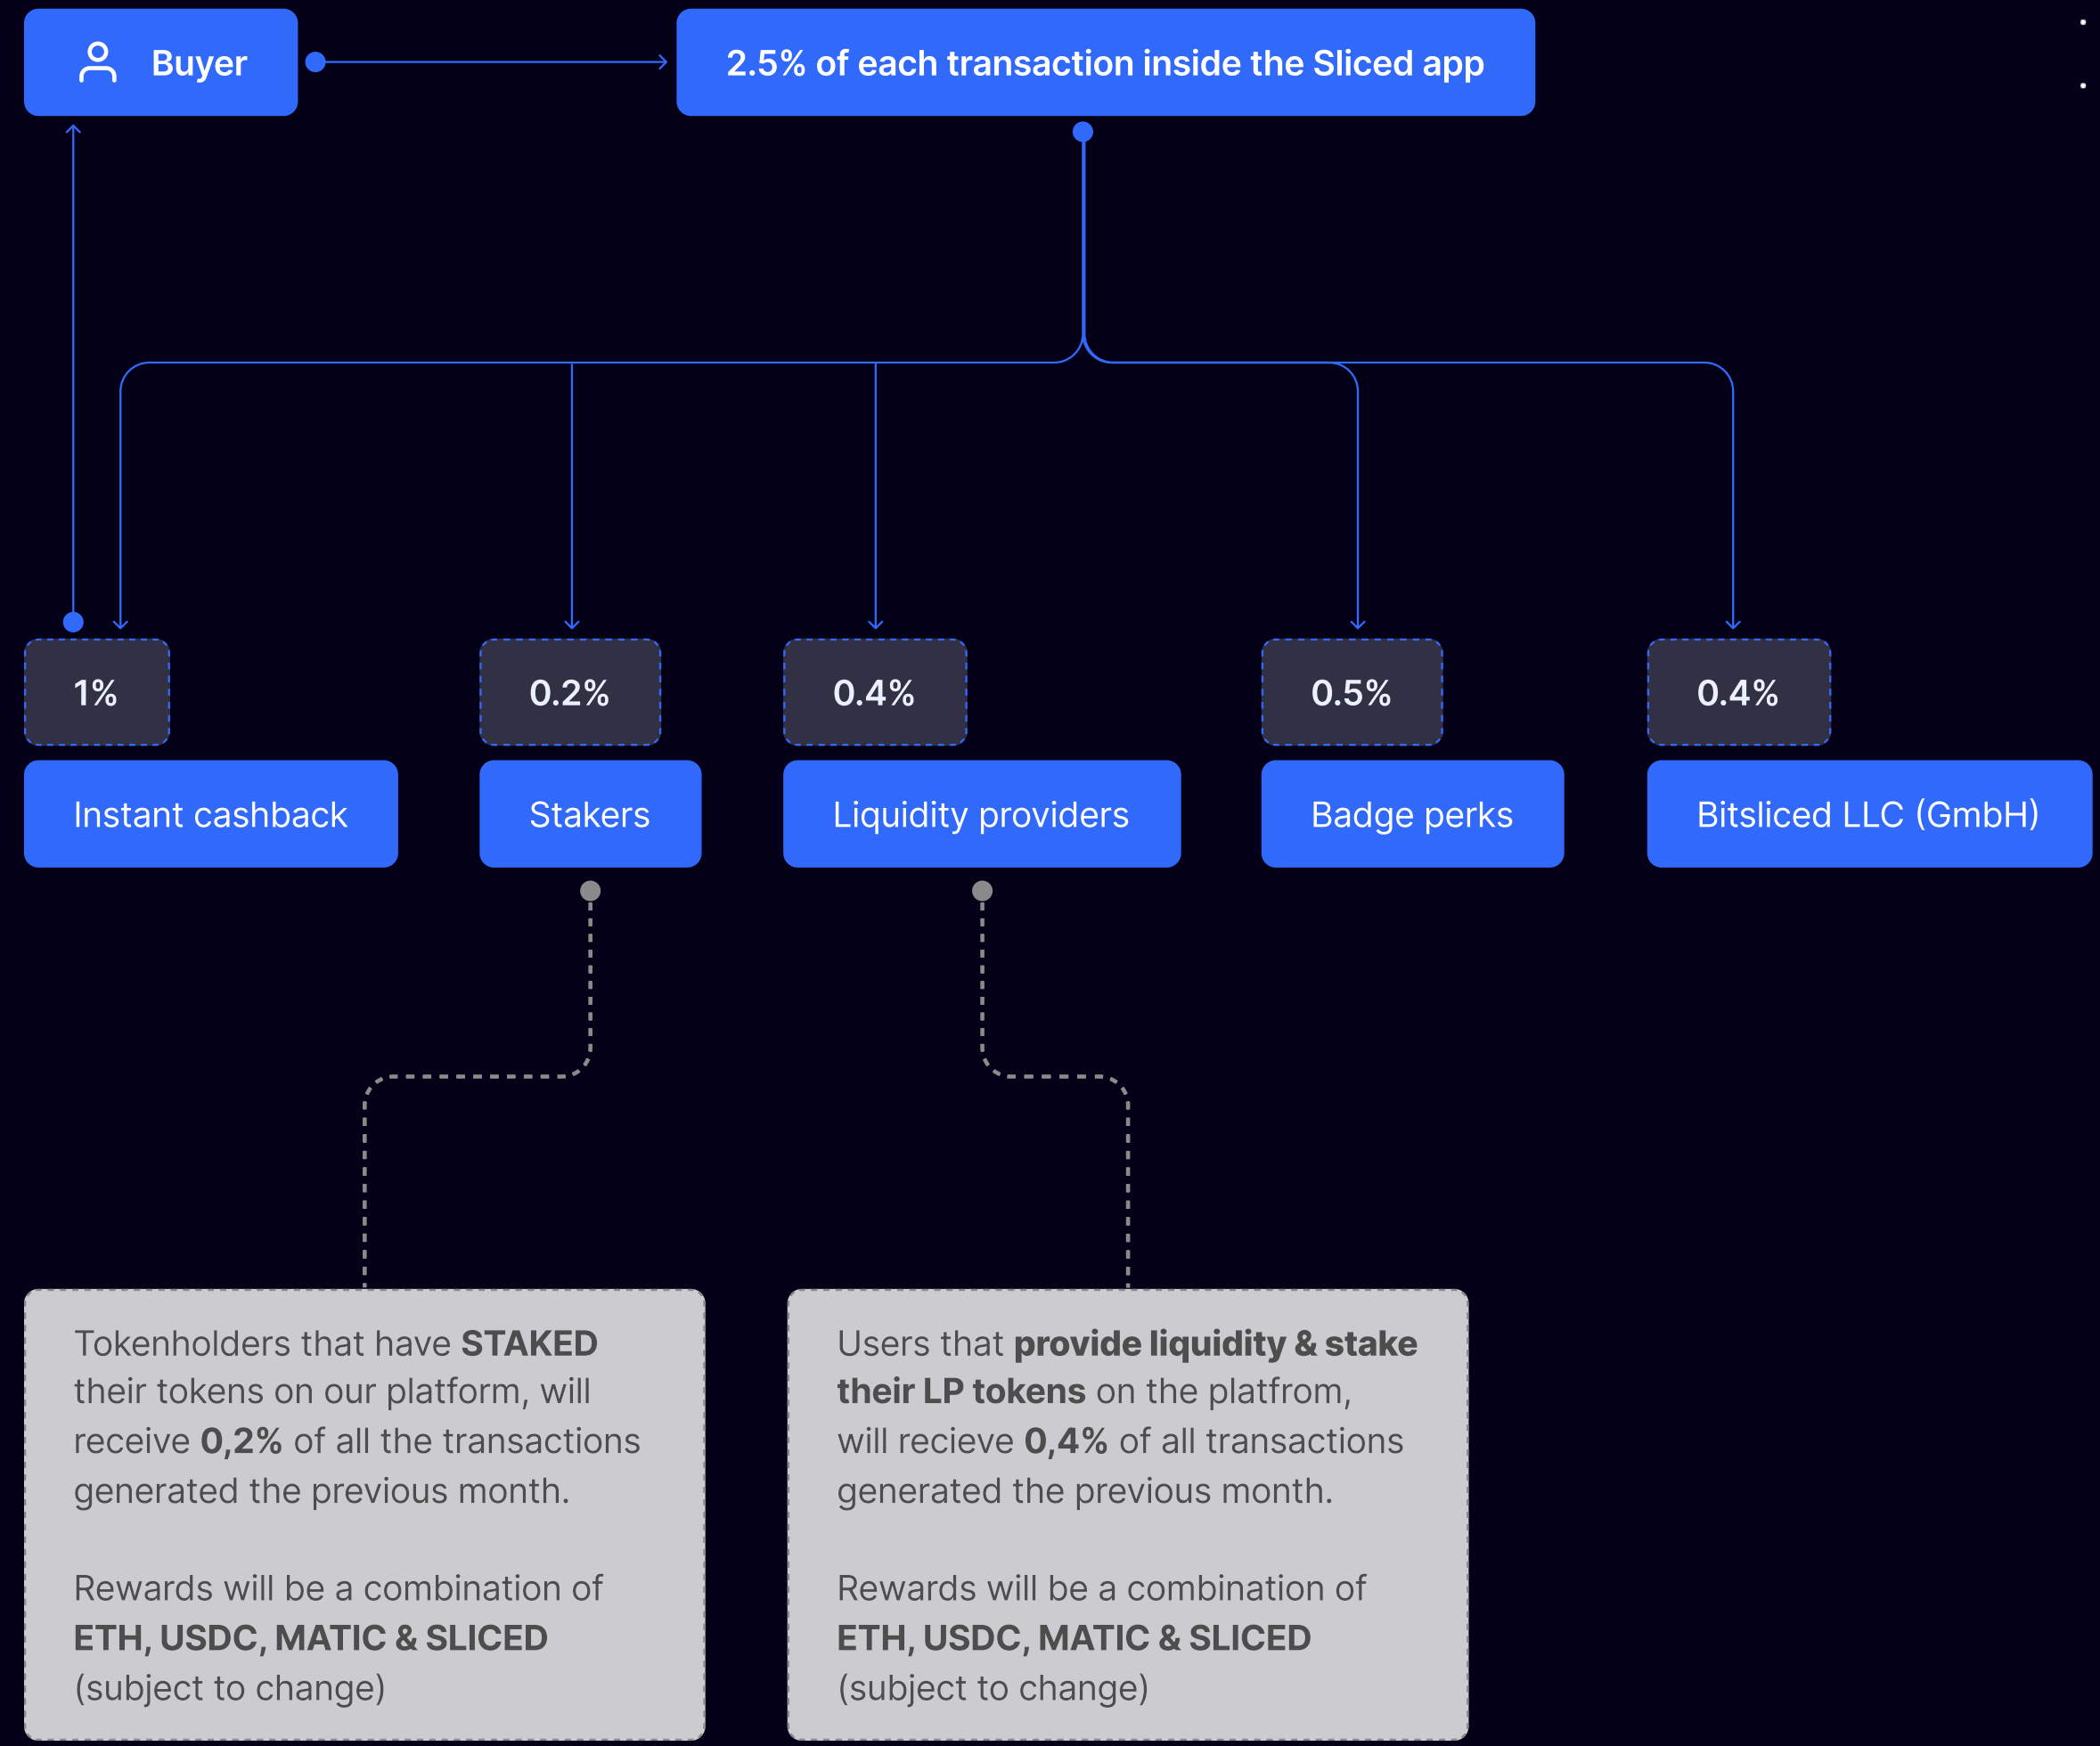

TRANSACTION FEE

SYSTEM

Cash backs

Each transaction within the Sliced NFT marketplace is immediately rewarded with a 1% cashback, with real estate purchases potentially having up to 8% cashback depending on the broker.

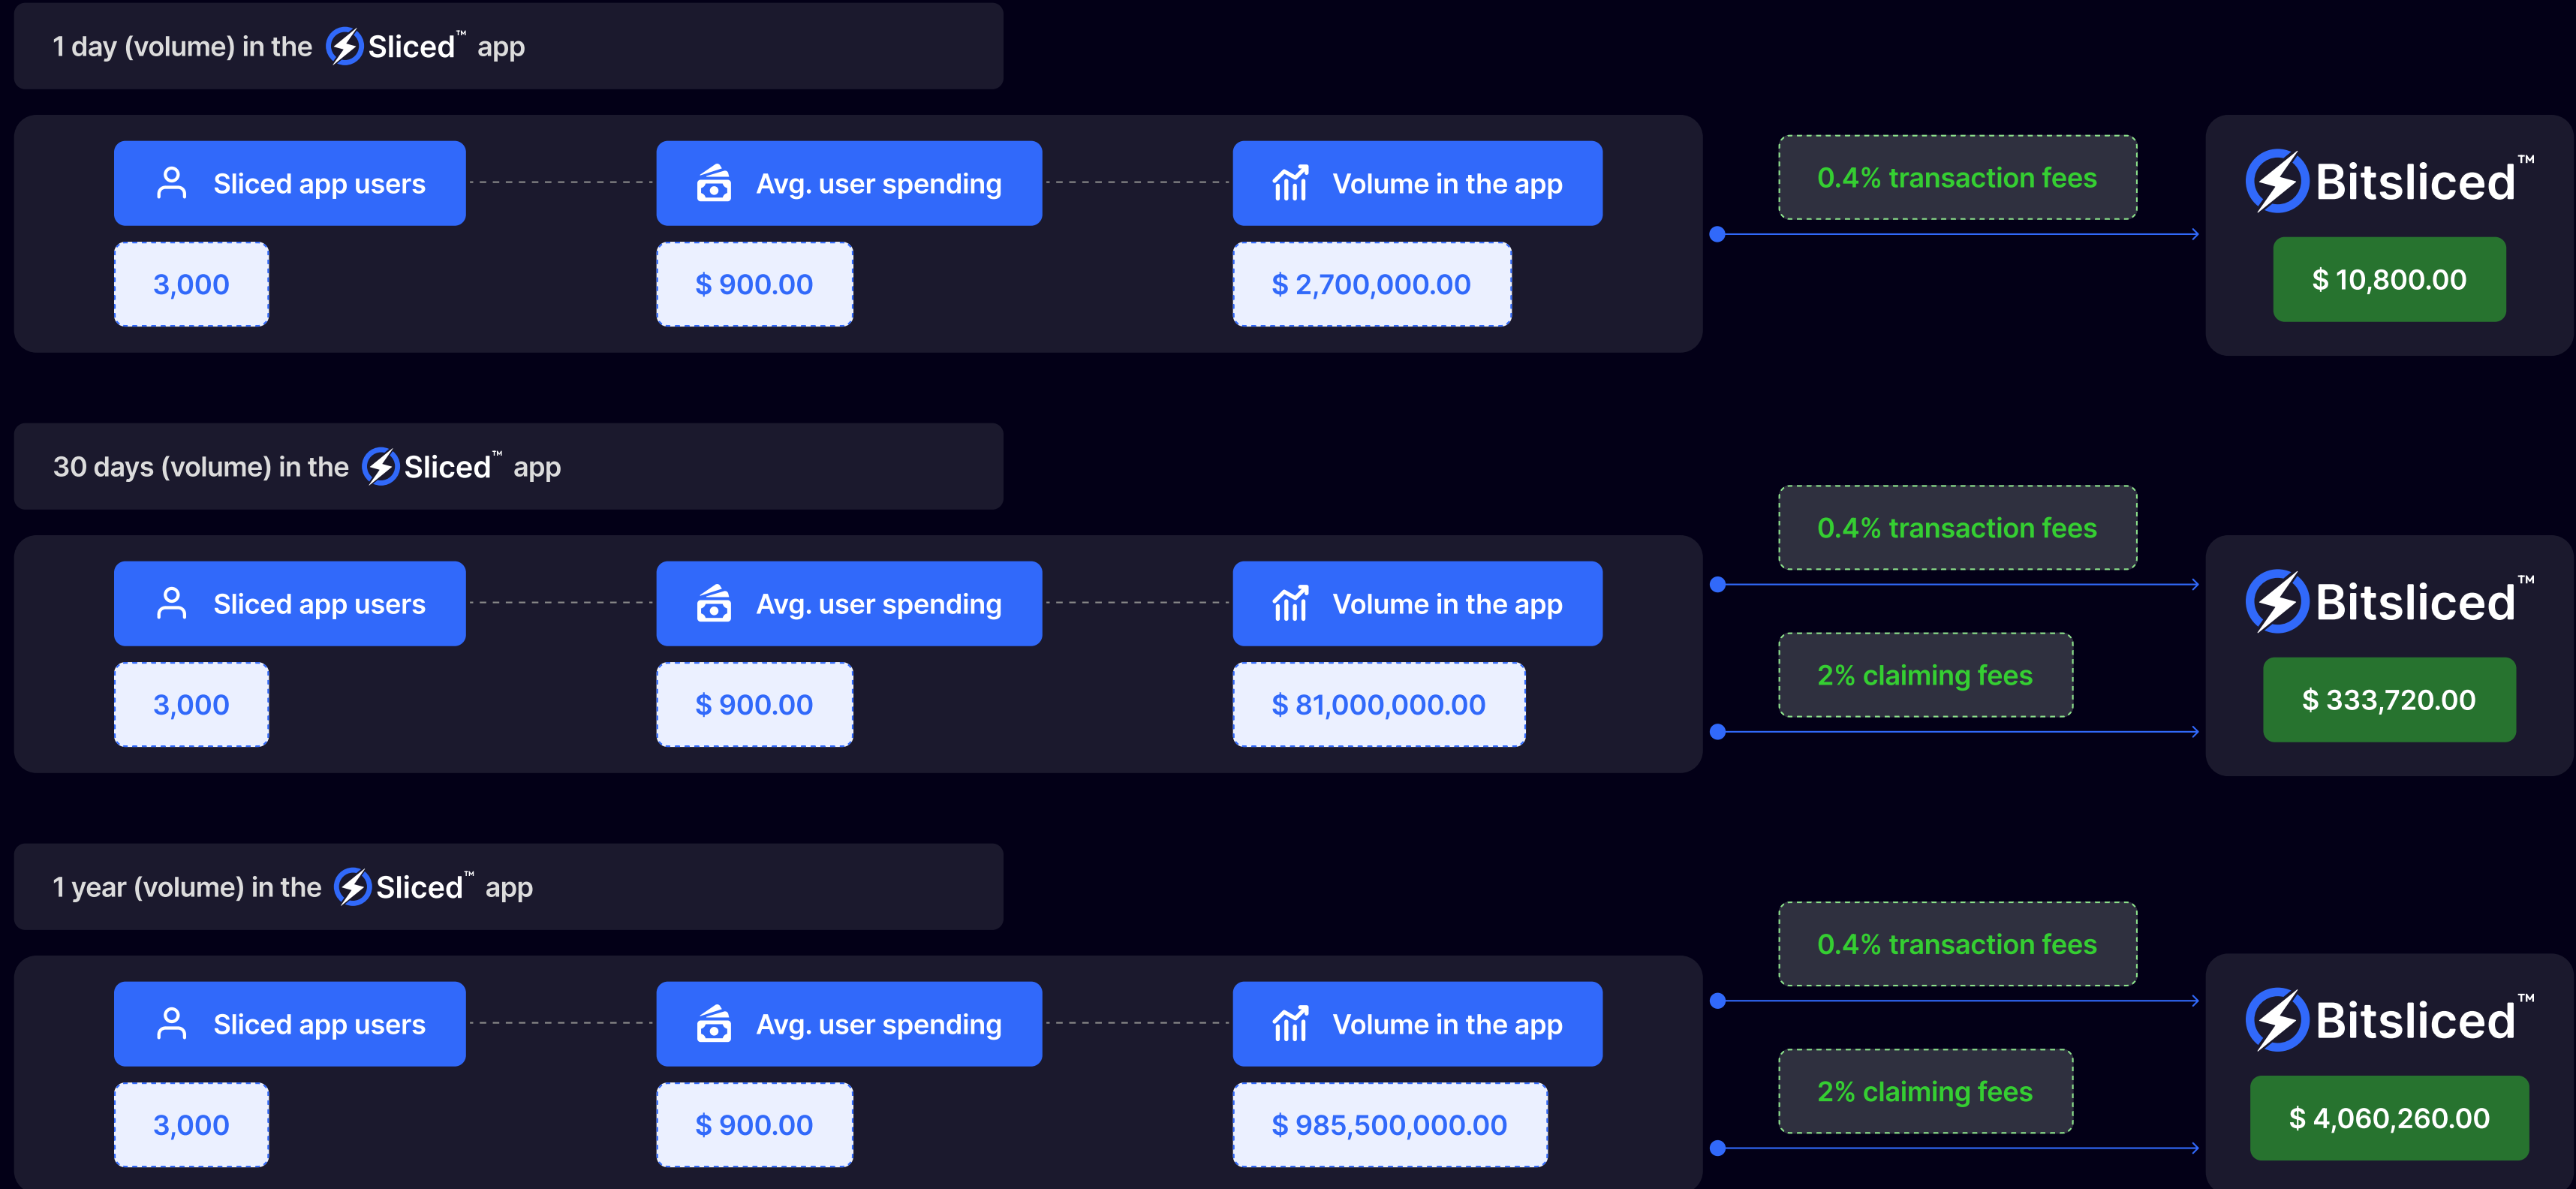

NFTs can be bought & sold with following cryptos:    

NFTs from other marketplaces can be traded on our marketplace as well.

Calculations

This estimation doesn't include the trading of real world assets, as well as the channels & fractional ownership features. However, it includes the revenue stream of an avg. active user base of 3000 members for the digital art market. Average based on: <https://dappradar.com/nft/marketplaces>
